JOSEPH WARREN II C. PAEZ

Quezon City, Philippines | 0905 428 8564 | paezken@gmail.com

PROFESSIONAL SUMMARY

Website Developer and BSIT graduate with hands-on experience developing and maintaining responsive websites using WordPress, HTML, CSS, JavaScript, PHP, and Odoo. Experienced in UI/UX design, technical support, troubleshooting, and collaborating with clients to deliver business-focused solutions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript

Backend: PHP, SQL, Java, Python, C#

CMS: WordPress, Shopify Liquid, Odoo

Tools: Figma, Hostinger, SAP ERP

Other: Responsive Web Design, Website Maintenance, Basic SEO, QA Testing, Troubleshooting, Database Management

PROFESSIONAL EXPERIENCE

Freelance Website Developer — **May 2025 – Present**

- Built and maintained WordPress websites through content updates and frontend enhancements.
- Improved website usability through layout optimization and technical troubleshooting.
- Developed a GPS-based Android application using Java with geotagging features.

Web Developer Intern – *Bleu Bean Café* — **Feb 2025 – May 2025**

- Developed and deployed a responsive company website using Odoo.
- Built custom webpages using HTML, CSS, and JavaScript.
- Designed user interfaces using Figma and collaborated with project stakeholders.

Technical Support Specialist – *Inspiro* — **Nov 2020 – Mar 2023**

- Provided primary technical support and account troubleshooting for wireless services.
- Performed QA testing on tools and interfaces, identifying and reporting website/system issues.
- Delivered high-quality customer and technical support while consistently meeting SLA targets.

PROJECTS

Online Reservation System

- Built a web-based reservation system using HTML, CSS, JavaScript, PHP, and SQL.
- Implemented database integration and a fully responsive UI.

Custom Cafe Business Website

- Collaborated with a team to develop a responsive café website using Odoo Website Builder.
- Customized website pages, layouts, and content to showcase brand identity, menus, locations, and customer experiences.

PAGASA Water Level & Rainfall Monitoring Application

- Developed a Python desktop overlay that retrieves PAGASA FFWS water-level and rainfall data and displays live monitoring information.
- Added automatic data updates, water-level trend indicators, alarm-level status, responsive resizing, and draggable overlay functionality.
- Implemented forecasting logic to estimate the possibility of reaching critical water levels based on available rainfall and water-level data.

GPS-Based Mobile Geotagging Application

- Built an Android application using Java integrated with GPS, camera, and mapping functionalities.
- Implemented real-time location metadata extraction and rendering.
